PREFACE

Ege University Faculty of Agriculture is one of the outstanding and example faculties in our country in research, education and social activity fields with its strong and experienced faculty staff.

Our university was moved to the second rank with its high performance among 120 universities in the field of agriculture and environment in the ranking of universities of Turkey disclosed by the Middle East Technical University, URAP (University Ranking by Academic Performance) Research Laboratory in 2011. Besides, only 5 universities from Turkey were able to enter the list of best 500 universities ranking in the ranking of world universities. According to this list, Ege University is ranked on the 232th row in the field of agriculture and environment.

Short resumes of our academic staff take place in this book which is prepared based on their own expressions, who assured us to attain this achievement through the excitement and endless energy of taking our faculty to higher levels. The main purpose in preparing this book is to introduce ourselves for all organisations and institutions, persons and students at home and abroad who are related with agriculture.

I present my sincere regards and my best wishes with the confidence that this book shall be beneficial for its readers which contains information regarding the valuable staff of our faculty.
